安全规章

电动工具通用安全警告

阅读所有警告和所有说明!不遵照以下警告 和说明会导致电击、着火和/或严重伤害。

保存所有警告和说明书以备查阅。

在所有下列的警告中术语"电动工具"指市电驱动 (有 线) 电动工具或电池驱动 (无线) 电动工具。

工作场地的安全

- ▶ **保持工作场地清洁和明亮。**混乱和黑暗的场地会引发
- ▶ 不要在易爆环境,如有易燃液体、气体或粉尘的环境 **下操作电动工具。**电动工具产生的火花会点燃粉尘或
- ▶ **让儿童和旁观者离开后操作电动工具。**注意力不集中 会使你失去对工具的控制。

- ▶ 电动工具插头必须与插座相配。绝不能以任何方式改 装插头。需接地的电动工具不能使用任何转换插头。 未经改装的插头和相配的插座将减少电击危险。
- ▶ 避免人体接触接地表面,如管道、散热片和冰箱。如 果你身体接地会增加电击危险。
- ▶ **不得将电动工具暴露在雨中或潮湿环境中。**水进入电 动工具将增加电击危险。
- ▶ 不得滥用电线。绝不能用电线搬运、拉动电动工具或 拔出其插头。使电线远离热源、油、锐边或运动部 件。受损或缠绕的软线会增加电击危险。
- ▶ 当在户外使用电动工具时,使用适合户外使用的外接 **软线。**适合户外使用的软线将减少电击危险。
- ▶ 如果在潮湿环境下操作电动工具是不可避免的,应使 用剩余电流动作保护器 (RCD)。使用 RCD 可减小 电击危险。

人身安全

- ▶ 保持警觉,当操作电动工具时关注所从事的操作并保 持清醒。当你感到疲倦,或在有药物、酒精或治疗反 应时,不要操作电动工具。在操作电动工具时瞬间的 疏忽会导致严重人身伤害。
- **▶ 使用个人防护装置。始终佩戴护目镜。**安全装置,诸 如适当条件下使用防尘面具、防滑安全鞋、安全帽、 听力防护等装置能减少人身伤害。
- ▶ 防止意外起动。确保开关在连接电源和/或电池盒、 **拿起或搬运工具时处于关断位置。**手指放在已接通电 源的开关上或开关处于接通时插入插头可能会导致危 险。

- ▶ 在电动工具接通之前,拿掉所有调节钥匙或扳手。遗 留在电动工具旋转零件上的扳手或钥匙会导致人身伤
- ▶ 手不要伸展得太长。时刻注意立足点和身体平衡。 样在意外情况下能很好地控制电动工具。
- 着装适当。不要穿宽松衣服或佩戴饰品。让你的衣 **服、手套和头发远离运动部件。**宽松衣服、佩饰或长 发可能会卷入运动部件中。
- ▶ 如果提供了与排屑、集尘设备连接用的装置,要确保 **他们连接完好且使用得当。**使用这些装置可减少尘屑 引起的危险。

电动工具使用和注意事项

- ▶ 不要滥用电动工具,根据用途使用适当的电动工具。 选用适当设计的电动工具会使你工作更有效、更安
- ▶ 如果开关不能接通或关断工具电源,则不能使用该电 动工具。不能用开关来控制的电动工具是危险的且必 须进行修理。
- ▶ 在进行任何调节、更换附件或贮存电动工具之前,必 **须从电源上拔掉插头和 / 或使电池盒与工具脱开。**这 种防护性措施将减少工具意外起动的危险。
- ▶ 将闲置不用的电动工具贮存在儿童所及范围之外,并 且不要让不熟悉电动工具或对这些说明不了解的人操 作电动工具。电动工具在未经培训的用户手中是危险
- ▶ 保养电动工具。检查运动件是否调整到位或卡住,检 查零件破损情况和影响电动工具运行的其他状况。如 **有损坏,电动工具应在使用前修理好。**许多事故由维 护不良的电动工具引发。
- ▶ **保持切削刀具锋利和清洁。**保养良好的有锋利切削刃 的刀具不易卡住而且容易控制。
- ▶ 按照使用说明书,考虑作业条件和进行的作业来使用 **电动工具、附件和工具的刀头等。**将电动工具用于那 些与其用途不符的操作可能会导致危险。

▶ 将你的电动工具送交专业维修人员,使用同样的备件 **进行修理。**这样将确保所维修的电动工具的安全性。

针对角磨机的安全规章

砂磨、砂光、钢丝砂光或砂磨切割操作的通用安全警告

- ▶ 该电动工具是用于实现砂轮机、砂光机、钢丝刷或切 断工具功能的。阅读随该电动工具提供的所有安全警 **告、说明、图解和规定。**不了解以下所列所有说明将 导致电击、着火和/或严重伤害。
- ▶ **不推荐用该电动工具进行抛光。**电动工具不按指定的 功能去操作,可能发生危险和引起人身伤害。
- ▶ **不使用非工具制造商推荐和专门设计的附件。**否则该 附件可能被装到你的电动工具上,而它不能保证安全 操作。

1 619 P09 933 | (21.12.11)

▶ 附件的外径和厚度必须在电动工具额定能力范围之 内。不正确的附件尺寸不能得到充分防护或控制。

- ▶ 砂轮,法兰盘,靠背垫或任何其他附件的轴孔尺寸必 **须适合于安装到电动工具的主轴上。**带轴孔的,与电 动工具安装件不配的附件将会失稳,过度振动并会引
- ▶ 不要使用损坏的附件。在每次使用前要检查附件,例 如砂轮是否有碎片和裂缝,靠背垫是否有裂缝,撕裂 或过度磨损,钢丝刷是否松动或金属丝是否断裂。如 果电动工具或附件跌落了,检查是否有损坏或安装没 有损坏的附件。检查和安装附件后,让自己和旁观者 的位置远离旋转附件的平面,并以电动工具最大空载 速度运行 1 分钟。损坏的附件通常在该试验时会碎
- ▶ 戴上防护用品。根据适用情况,使用面罩,安全护目 镜或安全眼镜。适用时,戴上防尘面具,听力保护 **器,手套和能挡小磨料或工件碎片的工作围裙。**眼防 护罩必须挡住各种操作产生的飞屑。防尘面具或口罩 必须能够过滤操作产生的颗粒。长期暴露在高强度噪 音中会引起失聪。
- ▶ 让旁观者与工作区域保持一安全距离。任何进入工作 **区域的人必须戴上防护用品。**工件或破损附件的碎片 可能会飞出并引起紧靠着操作区域的旁观者的伤害。 切割附件触及带电导线会使电动工具外露的金属零件 带电,并使操作者触电。
- ▶ 当在切割附件有可能切割到暗线或自身电线的场所进 **行操作时,只能通过绝缘握持面来握住电动工具。**切 割附件碰到一根带电导线可能会使电动工具外露的金 属零件带电并使操作者发生电击危险。
- ▶ **使软线远离旋转的附件。**如果控制不当,软线可能被 切断或缠绕, 并使得你的手或手臂可能被卷入旋转附
- ▶ 直到附件完全停止运动才放下电动工具。并且不得使 **用任何外力迫使金刚石切割片停转。**旋转的附件可能 会抓住表面并拉动电动工具而让你失去对工具的挖
- ▶ **当携带电动工具时不要开动它。**意外地触及旋转附件 可能会缠绕你的衣服而使附件伤害身体。
- ▶ **经常清理电动工具的通风口。**电动机风扇会将灰尘吸 进机壳, 过多的金属粉末沉积会导致电气危险。
- ▶ **不要在易燃材料附近操作电动工具。**火星可能会点燃 这些材料,
- ▶ **不要使用需用冷却液的附件。**用水或其他冷却液可能 导致电腐蚀或电击。

反弹和相关警告

- ▶ 反弹是因卡住或缠绕住的旋转砂轮,靠背垫,钢丝刷 或其他附件而产生的突然反作用力。卡住或缠绕会引 起旋转附件的迅速堵转,随之使失控的电动工具在卡 住点产生与附件旋转方向相反的运动。 例如,如果砂轮被工件缠绕或卡住了,伸入卡住点的 砂轮边缘可能会进入材料表面而引起砂轮爬出或反 弹。砂轮可能飞向或飞离操作者,这取决于砂轮在卡 住点的运动方向。在此条件下砂轮也可能碎裂。 反弹是电动工具误用和/或不正确操作工序或条件的 结果。可以通过采取以下给出的适当预防措施得以避
- ▶ 保持紧握电动工具,使你的身体和手臂处于正确状态 以抵抗反弹力。如有辅助手柄,则要一直使用,以便 **最大限度控制住起动时的反弹力或反力矩。**如采取合 适的预防措施,操作者就可以控制反力矩或反弹力。
- ▶ 绝不能将手靠近旋转附件。附件可能会反弹碰到手。
- ▶ 不要站在发生反弹时电动工具可能移动到的地方。反 弹将在缠绕点驱使工具逆砂轮运动方向运动。
- ▶ 当在尖角、锐边等处作业时要特别小心。避免附件的 弹跳和缠绕。尖角,锐边和弹跳具有缠绕旋转附件的 趋势并引起反弹的失控。
- ▶ 不要附装上锯链、木雕刀片或带齿锯片。这些锯片会 产生频繁的反弹和失控。

对磨削和砂磨切割操作的专用安全警告

- ▶ 只使用所推荐的砂轮型号和为选用砂轮专门设计的护 罩。不是为电动工具设计的砂轮不能充分得到防护, 是不安全的。
- ▶ 防护罩必须牢固地装在电动工具上,并且被调整在最 具安全性的位置,只能有最小部分的砂轮暴露在操作 人前面。 防护罩能够保护操作者免受到爆裂砂轮碎片 割伤,避免操作者偶然触及砂轮以及火花点燃衣物等 的危险。
- ▶ 砂轮只用作推荐的用途。例如: 不要用切割砂轮的侧 面进行磨削。施加到砂轮侧面的力可能会使其碎裂。
- ▶ 始终为所选砂轮选用未损坏的,有恰当规格和形状的 砂轮法兰盘。合适的砂轮法兰盘支承砂轮可以减小砂 轮破裂的可能性。切割砂轮的法兰盘可以不同于砂轮
- ▶ 不要使用从大规格电动工具上用剩的磨损砂轮。用于 大规格电动工具上的砂轮不适于较小规格工具的高速 工况并可能会爆裂。

对砂轮切割操作的附加专用安全警告

- ▶ 不要"夹"住切割砂轮或施加过大的压力。不要试图做 过深的切割。给砂轮施加过应力增加了砂轮在切割时 的负载,容易缠绕或卡住,增加了反弹或砂轮爆裂的
- ▶ **身体不要对着旋转砂轮,也不要站在其后。**当把砂轮 从操作者身边的操作点移开时,可能的反弹会使旋转 砂轮和电动工具朝你推来。

Bosch Power Tools 1619 P09 933 I (21.12.11)

6 | 中文

- ▶ 当砂轮被卡住或无论任何原因而中断切割时,关掉电 动工具并握住工具不要动,直到砂轮完全停止。决不 要试图当砂轮仍然运转时使切割砂轮脱离切割,否则 会发生反弹。调查并采取校正措施以消除砂轮卡住的
- ▶ 不得在切割片与工件接触的情况下启动切割机,不能 在工件上重新起动切割操作。让砂轮达到全速后再小 心地重新进入切割。如果电动工具在工件上重新起 动,砂轮可能会卡住,爬出或反弹。
- ▶ 支撑住板材或超大工件可使得砂轮卡住和反弹的危险 **降到最低限度。**大工件凭借自重而下垂。必须在工件 靠近切割线处和砂轮两侧近工件边缘处放置支承。
- ▶ 当进行 "盲切割" 进入墙体或其他盲区时要格外小心。 伸出的砂轮可能会割到煤气管或水管,电线或由此引 起反弹的物体。

砂光操作的专用安全警告

▶ 当砂光时,不要使用超大砂盘纸。选用砂盘纸时应按 照制造商的推荐。超出砂光垫盘的大砂盘纸有撕裂的 危险并且会引起缠绕、砂盘的撕裂或反弹。

钢丝刷操作的专用安全警告

- ▶ 要意识到即使正常操作时钢丝线也会从刷子甩出。不 要对钢丝刷施加过大的负荷而使得钢丝线承受过应 力。钢丝线可能会轻易刺入薄的衣服和/或皮肤内。
- ▶ 如果建议钢丝刷使用护罩,则不允许该护罩对钢丝轮 或钢丝刷有任何干扰。钢丝轮或钢丝刷在工作负荷和 离心力作用下直径会变大。

其它的警告事项

1 619 P09 933 | (21.12.11)

请佩戴护目镜。

- ▶ 使用合适的侦测装置侦察隐藏的电线,或者向当地的 相关单位寻求支援。接触电线可能引起火灾並让操作 者触电。损坏了瓦斯管会引起爆炸。凿穿水管不仅会 造成严重的财物损失, 也可能导致触电。
- ▶ 如果电源突然中断,例如停电或不小心拔出插头,得 马上解除起 停开关的锁定并把它设定在关闭的位置。 这样可以避免机器突然起动。
- ▶ 在研磨 / 割片尚未冷却之前,切勿持握研磨 / 割片。 工作时切割片会变得非常炙热。
- ▶ **固定好工件。**使用固定装置或老虎钳固定工件,会比 用手持握工件更牢固。

产品和功率描述

阅读所有的警告提示和指示。如未确实遵 循警告提示和指示,可能导致电击、火灾 並且/或其他的严重伤害。

按照规定使用机器

本电动工具适合在金属和石材上进行切割,粗磨以及使 用钢丝刷研磨。操作机器时不需要用水冲刷。 使用结合的磨具切割时, 必须安装特殊的切割防护罩。 切割石材时,必须安装合适的吸尘装置。 安装了经过许可的磨具后,也可以使用本电动工具进行 砂纸研磨。

插图上的机件

机件的编号和电动工具详解图上的编号一致。

- 1 主轴锁定键
- 2 起停开关
- 3 辅助手柄 (绝缘握柄)
- 5 针对研磨时使用的防护罩
- 6 防护罩的固定螺丝
- 7 含 O 形环的固定法兰
- 8 磨片*
- 9 夹紧螺母
- 10 针对夹紧螺母的双销扳手*
- 11 快速螺母 **SDS-***clic* *
- 12 超合金杯碟*
- 13 针对切割时使用的防护罩*
- 14 切割片*
- 15 磨杯的防护罩*
- 16 磨杯*
- 17 针对磨杯的曲柄双销扳手*
- 18 护手片*
- 19 定距片*
- 20 橡胶磨盘*
- 21 砂纸*
- 22 圆螺母*
- 24 以导引板切割时所使用的吸尘罩*
- 25 金刚石切割片*

- 26 手柄 (绝缘握柄)
- *图表或说明上提到的附件,并不包含在基本的供货范围中。本 公司的附件清单中有完整的附件供应项目。

中文 | 7

角磨机		TWS 2000
		Professional
物品代码		0 601 849 1
额定输入功率	瓦	2000
输出功率	瓦	1 250
额定转速	次1分	8500
最大砂轮直径	毫米	180
主轴螺纹		M 14
研磨轴上的最大螺纹长度	毫米	25
重量符合 EPTA-Procedure		
01/2003	公斤	5,0
绝缘等级		□/II

本说明书提供的参数是以 230 V 为依据,於低电压地区,此数据 有可能不同。

请认清电动工具铭牌上的物品代码。电动工具在销售市场上没有 统一的商品名称。

开动电动工具时,电压会突然下降。如果电源网络状况不佳,可能会干扰其它机器。在电源阻抗小于 0,25 欧姆时不会产生干扰

安装

安装保护装备

▶ 维修电动工具或换装零、配件之前,务必从插座上拔 出插头。

指示: 如果研磨片在工作中途断裂了, 或者防护罩上/ 电动工具上 的接头损坏了, 务必即刻将电动工具交给顾 客服务处修理。地址可以参考"顾客服务处和顾客咨询 中心"。

研磨时使用的防护罩

把防护罩 5 安装在主轴上。根据工作需要调整好防护罩 5 的位置,接著再使用固定螺丝6锁定防护罩5。

▶ 适度地调整防护罩 5,避免让工作时产生的火花喷向 操作者。

切割时使用的防护罩

- ▶ 使用结合的磨具切割时,务必安装针对切割的防护罩
- ▶ 在石材上进行切割时,必须安装合适的吸尘装置。

以安装研磨防护罩 5 的方式安装切割防护罩 13。

切割时使用的带有导引板的吸尘罩

以安装研磨防护罩 5 的方式安装切割时使用的带有导引 板的吸尘罩 24。

辅助手柄

▶ 操作电动工具时务必使用辅助手柄 3.

根据工作要求,把辅助手柄3安装在机头的右侧或左 侧。

护手片

▶ 使用橡胶磨盘 20, 杯形钢丝刷, 轮刷和千叶砂磨轮 工作时,务必在机器上加装护手片 18。

使用辅助手柄 3 夹住护手片 18。

安装磨具

- ▶ 维修电动工具或换装零、配件之前,务必从插座上拔
- ▶ 在研磨/割片尚未冷却之前,切勿持握研磨/割片。 工作时切割片会变得非常炙热。

清洁主轴 4 和所有即将安装的零件。

安装及拆卸磨具时,必须先使用主轴锁定键 1 固定主

▶ 待主轴完全静止后,才可以使用主轴锁定键。否则可 能会损坏电动工具。

研磨/切割片

注意磨具的规格。磨具上的孔直径必须和固定法兰完全 吻合。不可以使用转接头或异径管。

使用金刚石切割片时,金刚石切割片上的箭头方向,必 须和机器的转向一致 (参考机头上的转向箭头)。

安装过程请参考插图。

转入夹紧螺母9以便固定研磨/切割片。使用双销扳手 拧紧螺母,请参考"快速螺母"。

▶ 在安装好磨具且尚未开动机器之前,必须检查磨具 是 否正确地装牢了,磨具能否自由无阻地旋转。务必 确 定磨具转动时不会和防护罩或其它的机件产生磨擦。

在固定法兰7的定心轴环上有一个 塑料零件 (O形环)。如果缺少 O 形环或 O 形环损坏了, 务必在继续 使用之前更换固定法兰7。

千叶砂磨轮

▶ 使用千叶砂磨轮工作时务必在机器上加装护手片 18。

橡胶磨盘

▶ 使用橡胶磨盘 20 工作时务必在机器上加装护手片 18.

安装过程请参考插图。

安装橡胶磨盘 20 之前必须先把 2 个定距片 19 放入主轴 4 中。

转入圆螺母 22 并使用双销扳手拧紧。

杯形钢丝刷/轮刷

▶ 使用杯形钢丝刷或轮刷工作时务必在机器上加装护手

安装过程请参考插图。

8|中文

把杯形钢丝刷/轮刷装入主轴中,上述磨具必须紧靠在 主轴螺纹末端的法兰上。使用开口扳手拧紧杯形钢丝刷/ 轮刷装。

磨杯

▶ 使用磨杯工作时必须安装特殊的防护罩 15。

视工作状况的需求来调整磨杯凸出於防护罩 15 之外的尺寸。磨杯 16 凸出于防护罩 15 之外的部分,必须完全符合实际工作状况的需要,不可以过之也不可以不及。安装过程请参考插图。

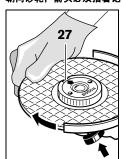

装上夹紧螺母 9 并使用曲柄双销扳手 17 拧紧螺母。

快速螺母 SDS-clic

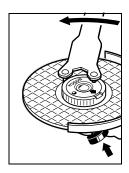

可以使用快速螺母 **11** 代替夹紧螺母 **9**。如此可以简化更换磨具的工作,无须借助任何工具。

▶ 快速螺母 11 只能安装在砂轮或切割片上。 只能使用完好,未受损的快速螺母 11。

安装快速螺母 11 时请注意,标示字母的这一面不可以 朝向砂轮;箭头必须指著记号 27。

使用主轴锁定键 1 固定主轴。然后朝著顺时针的方向用力地转动砂轮,以便拧紧快速螺母。

如果安装正确,而且快速 螺母未损坏的话,一般可 以用手朝著逆时针方向转 松快速螺母。

如果无法用手取出快速螺 中,则要使用双销扳手转 松螺母,千万不可以使用 钳子强行转开螺母。请参 考插图安装双销扳手。

机器适用的磨具

您可以使用本说明书中提到的所有磨具。 选用磨具的许可转速(次/分)或圆周转速(米/秒),必须和以下表格中的数据一致。

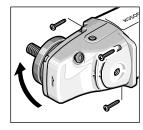

因此必须认清磨具标签上的许可 转速/圆周速度。

		D	D	a	【次/分】	【木/杪」
=	b D	180	8	22,2	8500	80
	D	180	-	-	8500	80
	b	100	30	M 14	8500	45

旋转机头

▶ 维修电动工具或换装零、配件之前,务必从插座上拔 出插头。

机器操作者可根据需要 分段式转动机头,每一 段的旋转角度为 90 度。此功能的优点是能 够在特殊的工作状况 下,把起停开关移动到 比较容易操作的位置。 例如切割时使用能够配 合导引板的吸尘罩 24, 或者针对左撇子。

先转出 4 个螺丝。小心地把机头旋转到需要的位置上, 无须从机壳上拆下机头。装回 4 个螺丝并将其拧紧。

吸锯尘 / 吸锯屑

▶ 含铅的颜料以及某些木材、矿物和金属的加工废尘有 害健康。机器操作者或者工地附近的人如果接触、吸 入这些废尘,可能会有 过敏反应或者感染呼吸道疾 病。

某些尘埃(例如加工橡木或山毛榉的废尘)可能致癌,特别是和处理 木材的添加剂(例如木材的防腐剂等)结合之后。只有经过专业训练的人才能够加工含石棉的物料。

- 尽可能使用适合物料的吸尘装置。
- 工作场所要保持空气流通。
- 最好佩戴 P2 滤网等级的口罩。

请留心并遵守贵国和加工物料有关的法规。

▶ 避免让工作场所堆积过多的尘垢。尘埃容易被点燃。

操作

操作机器

▶ 注意电源的电压!电源的电压必须和电动工具铭牌上 标示的电压一致。

1 619 P09 933 | (21.12.11)

▶ 机器上的附件可能割断隐藏着的电线或机器本身的电 源线, 所以一定要握着绝缘手柄 26 和辅助手柄 3 操 作机器。电动工具的附件如果接触了带电的线路, 机 器上的金属零件会导电,可能造成操作者触电。

如果把电动工具连接在行动的发电装置上(例如发电 机),由於上述装置的备用功率不足,而且也没有合适 的电压调节器 (例如未配备起动电流加强装置), 可能 在开动机器时发生功率不足或其它不寻常的反应。 操作机器时必须把机器连接在合适的电源上,并且要使 用正确的电压和电频率。

开动/关闭

开动 机器,向前推移起停开关 2,并按住开关。 锁定 被按住的起停开关 2,继续向前推移起停开关 2。 放开起停开关 2 便可以 关闭 电动工具。如果开关被锁定 了,必须先按下开关2並随即放开。

无锁定功能的起停开关 (针对某些特定国家):

开动 机器,向前推移起停开关 2,并按住开关。

放开起停开关 2 便可以 关闭 电动工具。

▶ 开机前,先检查是否已经正确地安装好磨具,观察磨 具转动时会不会产生磨擦,并且要进行至少 1 分钟的 无负载试机。切勿使用损坏、变形或转动时会震动的 **磨具。**损坏的磨具可能断裂并造成伤害。

有关操作方式的指点

- ▶ 在支撑墙上开缝时必须特别小心,参考 " 有关静力学 的注意事项 "。
- ▶ 固定好站立不稳的工件。
- ▶ 勿让电动工具因为过载而停止转动。
- ▶ 强烈过载之后必须让电动工具在无载的状况下运转数 分钟,这样能够帮助电动工具冷却。
- ▶ 在研磨/割片尚未冷却之前,切勿持握研磨/割片。 工作时切割片会变得非常炙热。
- ▶ 不可以把电动工具安装在切割研磨架上操作。

粗磨

▶ 勿使用切割片进行粗磨作业。

粗磨时如果砂轮和研磨表面成 30 或 40 度角,则能够达 到最好的粗磨效果。操作时只须轻压并来回地移动机 器,如此加工物料才不会变热,不会变色,并且物件表 面不会出现凹陷的痕迹。

千叶砂磨轮

使用千叶砂磨轮 (附件)可以在隆起的表面和型材上研

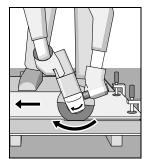

千叶砂磨轮的使用寿命,会比一般砂轮的使用寿命长。 而且它的工作噪音和研磨温度也比较低。

Bosch Power Tools

▶ 使用结合的磨具切割时,务必安装针对切割的防护罩

切割时必须施力均匀, 得根据工件的物料来决定推动的 力道。操作机器时勿重压机器, 勿倾斜, 勿摇晃。

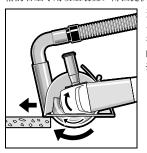

必须逆著机器的转向 推动电动工具, 否则 容易 失控, 并导致电 动工具从切线中滑出。

切割型材和四角钢管时,必须从直径最小处开始切割。

- ▶ 在石材上进行切割时,必须安装合适的吸尘装置。
- ▶ 请佩戴防尘面具。
- ▶ 本电动工具只能够进行乾式切割和乾式研磨。

切割石材时最好使用金刚石切割片。

使用带有导引板的吸尘罩 24 切割时,必须使用检验合 格的石尘专用吸尘装置。博世提供了合适的吸尘器。

开动电动工具, 并把 导引装置的前端放置 在工件上。参考工件 的物料,适当地施力 推进机器。

切割高硬度的工件时,例如碎石含量很高的水泥,可能 因为金刚石切割片过热而导致切割片损坏。如果切割工 件过硬,操作机器时金刚石切割片的周围会出现火花。 此时必须停下工作, 让切割片在空载的状况下以最高转 速运作片刻,如此可以帮助降低切割片的温度。

如果切割片的切割效率明显降低,而且进行切割时会出 现火花环,则表示金刚石切割片已经变钝。如果发生上 述状况,可以把切割片在研磨材料上 (例如石灰砂石) 来回刷磨数次,这样切割片又会锋利如初。

有关静力学的注意事项

关於在支撑墙上开缝时应该注意的事项,请参考 DIN 1053 第一部上的规定,或各国有关的法规。 务必确实遵循相关的法令规定。正式动工以前, 先向负 责的静力学者,工程师或工程负责人请教有关细节。

1619 P09 933 | (21.12.11)

10 | 中文

维修和服务

维修和清洁

- ▶ 维修电动工具或换装零、配件之前,务必从插座上拔 出插头。
- ▶ 电动工具和通风间隙都必须保持清洁,这样才能够提 高工作品质和安全性。
- ▶ 在某些极端的操作环境下,如果可能的话一定要使用 吸尘装备。吹除通气孔中的污垢并且要使用剩余电流 - (FI) - 保护开关。加工金属时可能在电动工具的内 部堆积会导电的废尘。这样可能会影响电动工具的安 全绝缘性能。

小心地保存和使用附件。

如果必须更换连接线,务必把这项工作交给博世或 者经 授权的博世电动工具顾客服务执行, 以避免危害机器的 安全性能。

本公司生产的电动工具都经过严密的品质检验,如果机 器仍然发生故障,请将机器交给博世电动工具公司授权 的顾客服务处修理。

询问和订购备件时,务必提供机器铭牌上标示的 10 位 数物品代码。

顾客服务处和顾客咨询中心

本公司顾客服务处负责回答有关本公司产品的修理,维 护和备件的问题。以下的网页中有爆炸图和备件的资 料:

www.bosch-pt.com

博世顾客咨询团队非常乐意为您解答有关购买, 使用和 设定本公司产品及附件的问题。

有关保证,维修或更换零件事宜,请向合格的经销商查 询。

Safety Notes

General Power Tool Safety Warnings

Read all safety warnings and all in-**▲** WARNING structions. Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury.

Save all warnings and instructions for future reference.

The term "power tool" in the warnings refers to your mainsoperated (corded) power tool or battery-operated (cordless) power tool.

Work area safety

- ► Keep work area clean and well lit. Cluttered or dark areas invite accidents.
- ▶ Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust. Power tools create sparks which may ignite the dust
- ► Keep children and bystanders away while operating a power tool. Distractions can cause you to lose control.

Electrical safety

- ▶ Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs with earthed (grounded) power tools. Unmodified plugs and matching outlets will reduce risk of electric shock.
- Avoid body contact with earthed or grounded surfaces, such as pipes, radiators, ranges and refrigerators. There is an increased risk of electric shock if your body is earthed or grounded.
- ▶ Do not expose power tools to rain or wet conditions. Water entering a power tool will increase the risk of electric shock.
- ▶ Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges and moving parts. Damaged or entangled cords increase the risk of electric shock
- ▶ When operating a power tool outdoors, use an extension cord suitable for outdoor use. Use of a cord suitable for outdoor use reduces the risk of electric shock.
- ▶ If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) protected **supply.** Use of an RCD reduces the risk of electric shock.

Personal safety

- ▶ Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication. A moment of inattention while operating power tools may result in serious personal injury.
- ▶ Use personal protective equipment. Always wear eye protection. Protective equipment such as dust mask, non-skid safety shoes, hard hat, or hearing protection

used for appropriate conditions will reduce personal inju-

- ▶ Prevent unintentional starting. Ensure the switch is in the off-position before connecting to power source and/or battery pack, picking up or carrying the tool. Carrying power tools with your finger on the switch or energising power tools that have the switch on invites acci-
- ▶ Remove any adjusting key or wrench before turning the power tool on. A wrench or a key left attached to a rotating part of the power tool may result in personal injury.
- Do not overreach. Keep proper footing and balance at all times. This enables better control of the power tool in unexpected situations.
- ▶ Dress properly. Do not wear loose clothing or iewellery. Keep your hair, clothing and gloves away from moving parts. Loose clothes, jewellery or long hair can be caught in moving parts.
- ▶ If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and properly used. Use of dust collection can reduce dust-related hazards.

Power tool use and care

- ▶ Do not force the power tool. Use the correct power tool for your application. The correct power tool will do the job better and safer at the rate for which it was designed.
- ▶ Do not use the power tool if the switch does not turn it on and off. Any power tool that cannot be controlled with the switch is dangerous and must be repaired.
- ▶ Disconnect the plug from the power source and/or the battery pack from the power tool before making any adjustments, changing accessories, or storing power tools. Such preventive safety measures reduce the risk of starting the power tool accidentally.
- ▶ Store idle power tools out of the reach of children and do not allow persons unfamiliar with the power tool or these instructions to operate the power tool. Power tools are dangerous in the hands of untrained users.
- ► Maintain power tools. Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the power tool's operation. If damaged, have the power tool repaired before use. Many accidents are caused by poorly maintained power
- ► Keep cutting tools sharp and clean. Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control.
- ▶ Use the power tool, accessories and tool bits etc. in accordance with these instructions, taking into account the working conditions and the work to be performed. Use of the power tool for operations different from those intended could result in a hazardous situation.

Service

► Have your power tool serviced by a qualified repair person using only identical replacement parts. This will ensure that the safety of the power tool is maintained.

English | 5

Safety Warnings common for Grinding, Sanding, Wire Brushing or Abrasive Cutting Off Operations

- ➤ This power tool is intended to function as a grinder, sander, wire brush or cut-off tool. Read all safety warnings, instructions, illustrations and specifications provided with this power tool. Failure to follow all instructions listed below may result in electric shock, fire and/or serious injury.
- ➤ This power tool is not recommended for polishing. Operations for which the power tool was not designed may create a hazard and cause personal injury.
- ➤ Do not use accessories which are not specifically designed and recommended by the tool manufacturer.

 Just because the accessory can be attached to your power tool, it does not assure safe operation.
- ➤ The rated speed of the accessory must be at least equal to the maximum speed marked on the power tool. Accessories running faster than their rated speed can break and fly apart.
- ➤ The outside diameter and the thickness of your accessory must be within the capacity rating of your power tool. Incorrectly sized accessories cannot be adequately guarded or controlled.
- ➤ The arbor size of wheels, flanges, backing pads or any other accessory must properly fit the spindle of the power tool. Accessories with arbor holes that do not match the mounting hardware of the power tool will run out of balance, vibrate excessively and may cause loss of control
- ▶ Do not use a damaged accessory. Before each use inspect the accessory such as abrasive wheels for chips and cracks, backing pad for cracks, tear or excess wear, wire brush for loose or cracked wires. If power tool or accessory is dropped, inspect for damage or install an undamaged accessory. After inspecting and installing an accessory, position yourself and bystanders away from the plane of the rotating accessory and run the power tool at maximum no-load speed for one minute. Damaged accessories will normally break apart during this test time.
- Wear personal protective equipment. Depending on application, use face shield, safety goggles or safety glasses. As appropriate, wear dust mask, hearing protectors, gloves and workshop apron capable of stopping small abrasive or workpiece fragments. The eye protection must be capable of stopping flying debris generated by various operations. The dust mask or respirator must be capable of filtrating particles generated by your operation. Prolonged exposure to high intensity noise may cause hearing loss.
- ➤ Keep bystanders a safe distance away from work area. Anyone entering the work area must wear personal protective equipment. Fragments of workpiece or of a broken accessory may fly away and cause injury beyond immediate area of operation.

- ► Hold the power tool by insulated gripping surfaces on-
- ly, when performing an operation where the cutting accessory may contact hidden wiring or its own cord. Cutting accessory contacting a "live" wire may make exposed metal parts of the power tool "live" and could give the operator an electric shock.
- Position the cord clear of the spinning accessory. If you lose control of the power tool, the cord may be cut or snagged and your hand or arm may be pulled into the spinning accessory.
- Never lay the power tool down until the accessory has come to a complete stop. The spinning accessory may grab the surface and pull the power tool out of your control.
- ➤ Do not run the power tool while carrying it at your side. Accidental contact with the spinning accessory could snag your clothing, pulling the accessory into your body.
- Regularly clean the power tool's air vents. The motor's fan will draw the dust inside the housing and excessive accumulation of powdered metal may cause electrical hazards.
- ➤ Do not operate the power tool near flammable materials. Sparks could ignite these materials.
- Do not use accessories that require liquid coolants. Using water or other liquid coolants may result in electrocution or shock.

Kickback and related warnings

- ► Kickback is a sudden reaction to a pinched or snagged rotating wheel, backing pad, brush or any other accessory. Pinching or snagging causes rapid stalling of the rotating accessory which in turn causes the uncontrolled power tool to be forced in the direction opposite of the accessory's rotation at the point of the binding.
- For example, if an abrasive wheel is snagged or pinched by the workpiece, the edge of the wheel that is entering into the pinch point can dig into the surface of the material causing the wheel to climb out or kick out. The wheel may either jump toward or away from the operator, depending on direction of the wheel's movement at the point of pinching. Abrasive wheels may also break under these condi-
- Kickback is the result of power tool misuse and/or incorrect operating procedures or conditions and can be avoided by taking proper precautions as given below.
- ► Maintain a firm grip on the power tool and position your body and arm to allow you to resist kickback forces. Always use auxiliary handle, if provided, for maximum control over kickback or torque reaction during start-up. The operator can control torque reactions or kickback forces, if proper precautions are taken.
- ► Never place your hand near the rotating accessory. Accessory may kickback over your hand.
- ➤ Do not position your body in the area where power tool will move if kickback occurs. Kickback will propel the tool in direction opposite to the wheel's movement at the point of snagging.
- ► Use special care when working corners, sharp edges, etc. Avoid bouncing and snagging the accessory. Cor-

ners, sharp edges or bouncing have a tendency to snag the rotating accessory and cause loss of control or kickback.

▶ Do not attach a saw chain woodcarving blade or toothed saw blade. Such blades create frequent kickback and loss of control over the power tool.

Safety warnings specific for Grinding and Abrasive Cutting-Off operations

- ▶ Use only wheel types that are recommended for your power tool and the specific guard designed for the selected wheel. Wheels for which the power tool was not designed cannot be adequately guarded and are unsafe.
- ► The guard must be securely attached to the power tool and positioned for maximum safety, so the least amount of wheel is exposed towards the operator. The guard helps to protect operator from broken wheel fragments, accidental contact with wheel and sparks that could ignite clothing.
- ▶ Wheels must be used only for recommended applications. For example: do not grind with the side of the cut-off wheel. Abrasive cut-off wheels are intended for peripheral grinding; side forces applied to these wheels may cause them to shatter.
- ► Always use undamaged wheel flanges that are of correct size and shape for your selected wheel. Proper wheel flanges support the wheel thus reducing the possibility of wheel breakage. Flanges for cut-off wheels may be different from grinding wheel flanges.
- ▶ Do not use worn down wheels from larger power tools. Wheels intended for larger power tools are not suitable for the higher speed of a smaller tool and may burst.

Additional safety warnings specific for abrasive cutting off operations

- ▶ Do not "jam" the cut-off wheel or apply excessive pressure. Do not attempt to make an excessive depth of cut. Overstressing the wheel increases the loading and susceptibility to twisting or binding of the wheel in the cut and the possibility of kickback or wheel breakage.
- ▶ Do not position your body in line with and behind the rotating wheel. When the wheel, at the point of operation, is moving away from your body, the possible kickback may propel the spinning wheel and the power tool directly at you.
- ▶ When wheel is binding or when interrupting a cut for any reason, switch off the power tool and hold the power tool motionless until the wheel comes to a complete stop. Never attempt to remove the cut-off wheel from the cut while the wheel is in motion otherwise kickback may occur. Investigate and take corrective action to eliminate the cause of wheel binding.
- ▶ Do not restart the cutting operation in the workpiece. Let the wheel reach full speed and carefully re-enter the cut. The wheel may bind, walk up or kickback if the power tool is restarted in the workpiece.
- ► Support panels or any oversized workpiece to minimize the risk of wheel pinching and kickback. Large workpieces tend to sag under their own weight. Supports must

be placed under the workpiece near the line of cut and near the edge of the workpiece on both sides of the wheel.

▶ Use extra caution when making a "pocket cut" into existing walls or other blind areas. The protruding wheel may cut gas or water pipes, electrical wiring or objects that can cause kickback.

Safety warnings specific for sanding operations

▶ Do not use excessively oversized sanding disc paper. Follow manufacturers recommendations, when selecting sanding paper. Larger sanding paper extending beyond the sanding pad presents a laceration hazard and may cause snagging, tearing of the disc, or kickback.

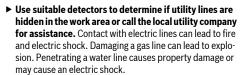

Safety warnings specific for wire brushing operations

- ▶ Be aware that wire bristles are thrown by the brush even during ordinary operation. Do not overstress the wires by applying excessive load to the brush. The wire bristles can easily penetrate light clothing and/or skin.
- ▶ If the use of a guard is recommended for wire brushing, do not allow any interference of the wire wheel or brush with the guard. Wire wheel or brush may expand in diameter due to work load and centrifugal forces.

Additional safety warnings

Wear safety goggles.

- ► Release the On/Off switch and set it to the off position when the power supply is interrupted, e.g., in case of a power failure or when the mains plug is pulled. This prevents uncontrolled restarting.
- ▶ Do not touch grinding and cutting discs before they have cooled down. The discs can become very hot while working.
- ► Secure the workpiece. A workpiece clamped with clamping devices or in a vice is held more secure than by hand.

Products sold in GB only: Your product is fitted with an BS 1363/A approved electric plug with internal fuse (ASTA approved to BS 1362).

If the plug is not suitable for your socket outlets, it should be cut off and an appropriate plug fitted in its place by an authorised customer service agent. The replacement plug should have the same fuse rating as the original plug. The severed plug must be disposed of to avoid a possible

shock hazard and should never be inserted into a mains socket elsewhere.

Products sold in AUS and NZ only: Use a residual current device (RCD) with a rated residual current of 30 mA or less.

English | 7

Read all safety warnings and all instructions. Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury.

Intended Use

The machine is intended for cutting, roughing and brushing of metal and stone materials without the use of water. For cutting with bonded abrasives, a special cutting guide (accessory) must be used.

When cutting in stone, provide for sufficient dust extraction. With approved sanding tools, the machine can be used for sanding with sanding discs.

Product Features

The numbering of the product features refers to the illustration of the machine on the graphics page.

- 1 Spindle lock button
- 2 On/Off switch
- 3 Auxiliary handle (insulated gripping surface)
- 4 Grinder spindle
- 5 Protection guard for grinding
- 6 Locking screw for protection guard
- 7 Mounting flange with O-ring
- 8 Grinding disc'
- 9 Clamping nut
- 10 Two-pin spanner for clamping nut*
- 11 Quick-clamping nut SDS-clic *
- 12 Carbide grinding head*
- 13 Protection guard for cutting*
- 14 Cutting disc*
- 15 Protection guard for for grinding cup*
- 16 Grinding cup*
- 17 Two-pin spanner, offset, for grinding cup*
- 18 Hand guard*
- 19 Spacer discs*
- 20 Rubber sanding plate*
- 21 Sanding sheet*
- 22 Round nut*
- 23 Cup brush*
- 24 Cutting guide with dust extraction protection guard *
- 25 Diamond cutting disc*
- 26 Handle (insulated gripping surface)

*Accessories shown or described are not part of the standard delivery scope of the product. A complete overview of accessories can be found in our accessories program.

Technical Data

Angle Grinder		TWS 2000 Professional
Article number		0 601 849 1
Rated power input	W	2000
Output power	W	1250
Rated speed	min ⁻¹	8500
Grinding disc diameter, max.	mm	180
Thread of grinder spindle		M 14
Thread length (max.) of grinder spindle	mm	25
Weight according to EPTA-Procedure 01/2003	kg	5.0
Protection class		□/II
The values given are valid for a nominal vol	tage [11]	of 230 V For differ-

The values given are valid for a nominal voltage [U] of 230 V. For differ ent voltages and models for specific countries, these values can vary.

Please observe the article number on the type plate of your machine. \\ The trade names of the individual machines may vary.

Starting cycles generate brief voltage drops. Interference with other equipment/machines may occur in case of unfavourable mains system conditions. Malfunctions are not to be expected for system impedances below 0.25 ohm.

Assembly

Mounting the Protective Devices

▶ Before any work on the machine itself, pull the mains plug.

Note: After breakage of the grinding disc during operation or damage to the holding fixtures on the protection guard/power tool, the machine must promptly be sent to an after-sales service agent for maintenance for addresses, see section "After-sales Service and Customer Assistance".

Protection Guard for Grinding

Place the protection guard 5 on the spindle collar. Adjust the position of the protection guard 5 to the requirements of the operation and lock the protection guard 5 with the locking screw 6.

▶ Adjust the protection guard 5 in such a manner that sparking is prevented in the direction of the operator.

Protection Guard for Cutting

- ► For cutting with bonded abrasives, always use the protection guard for cutting 13.
- ▶ Provide for sufficient dust extraction when cutting

The protection guard for cutting 13 is mounted in the same manner as the protection guard for grinding 5.

Cutting Guide with Dust Extraction Protection Guard

The cutting guide with dust extraction protection guard 24 is mounted in the same manner as the protection guard for grinding 5.

Auxiliary Handle

▶ Operate your machine only with the auxiliary handle 3.

1 619 P09 933 | (21.12.11)

8 | English

Screw on the round nut 22 and tighten with the two-pin span-

Hand Guard

► For operations with the rubber sanding plate 20 or with the cup brush/wheel brush/flap disc, always mount the hand guard 18.

The hand guard 18 is fastened with the auxiliary handle 3.

Mounting the Grinding Tools

- ▶ Before any work on the machine itself, pull the mains
- ▶ Do not touch grinding and cutting discs before they have cooled down. The discs can become very hot while

Clean the grinder spindle 4 and all parts to be mounted.

For clamping and loosening the grinding tools, lock the grinder spindle with the spindle lock button 1.

► Actuate the spindle lock button only when the grinder spindle is at a standstill. Otherwise, the machine may become damaged.

Grinding/Cutting Disc

Pay attention to the dimensions of the grinding tools. The mounting hole diameter must fit the mounting flange without play. Do not use reducers or adapters.

When using diamond cutting discs, pay attention that the direction-of-rotation arrow on the diamond cutting disc and the direction of rotation of the machine (see direction-of-rotation arrow on the machine head) agree.

See graphics page for the mounting sequence.

To fasten the grinding/cutting disc, screw on the clamping nut 9 and tighten with the two-pin spanner; see Section "Quick-

▶ After mounting the grinding tool and before switching on, check that the grinding tool is correctly mounted and that it can turn freely. Make sure that the grinding tool does not graze against the protection guard or other parts.

A plastic part (O-ring) is fitted around the centring collar of mounting flange 7. If the O-ring is missing or damaged, the mounting flange 7 must be replaced before resuming operation.

Flap Disc

▶ For operations with the flap disc, always mount the hand guard 18.

Rubber Sanding Plate

See graphics page for the mounting sequence.

Before mounting the rubber sanding plate 20, put the 2 spacer discs 19 onto the grinder spindle 4.

Cup Brush/Disc Brush

► For operations with the cup brush/wheel brush, always mount the hand guard 18.

See graphics page for the mounting sequence.

The cup brush/disc brush must be able to be screwed onto the grinder spindle until it rests firmly against the grinder spindle flange at the end of the grinder spindle threads. Tighten the cup brush/disc brush with an open-end spanner.

Grinding Cup

▶ When working with the grinding cup, mount the special protection guard 15.

The grinding cup 16 should never project further out of the protection guard 15 than necessary for the respective grinding application. Adjust the protection guard 15 accordingly to this dimension.

See graphics page for the mounting sequence.

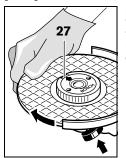

Screw on clamping nut 9 and tighten with two-pin spanner

Quick-clamping Nut SDS-clic

For convenient changing of grinding tools without the use of additional tools, you can use the quick-clamping nut 11 instead of the clamping nut 9.

▶ The quick-clamping nut 11 may be used only for grinding or cutting discs.

Use only a flawless, undamaged quick-clamping nut 11. When screwing on, pay attention that the side of the quick-clamping nut 11 with printing does not face the grinding disc; the arrow must point to the index mark 27.

Lock the grinder spindle with the spindle lock button 1. To tighten the quick-clamping nut, firmly turn the grinding disc in clockwise direction.

▶ For operations with the rubber sanding plate 20, always mount the hand guard 18.

1 619 P09 933 | (21.12.11) Bosch Power Tools

A properly attached, undamaged quick-clamping nut can be loosened by hand when turning the knurled ring in anticlockwise direction.

Never loosen a tight quickclamping nut with pliers. Always use the two-pin spanner. Insert the two-pin spanner as shown in the illustration.

Approved Grinding Tools

All grinding tools mentioned in these operating instructions can be used.

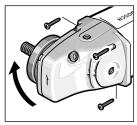

The permissible speed [min⁻¹] or the circumferential speed [m/s] of the grinding tools used must at least match the values

Therefore, observe the permissible rotational/circumferential speed on the label of the grinding tool.

	max. [mm]		[mm]		0
	D	b	d	[min ⁻¹]	[m/s]
b D	180	8	22.2	8500	80
D	180	-	-	8500	80
bD	100	30	M 14	8500	45

Rotating the Machine Head

▶ Before any work on the machine itself, pull the mains plug.

The machine head can be rotated with respect to the machine housing in 90° steps. In this manner, the On/Off switch can be brought into a more convenient position for special working situations, e.g., for cutting operations using the cutting guide with dust extrac-

tion protection guard 24 or for left-handed persons.

Completely unscrew the four screws. Rotate the machine head carefully, without removing it from the housing, to the new position. Screw in and tighten the four screws again.

Dust/Chip Extraction

▶ Dusts from materials such as lead-containing coatings, some wood types, minerals and metal can be harmful to one's health. Touching or breathing-in the dusts can cause allergic reactions and/or lead to respiratory infections of the user or bystanders.

Certain dusts, such as oak or beech dust, are considered as carcinogenic, especially in connection with wood-treatment additives (chromate, wood preservative). Materials containing asbestos may only be worked by specialists.

- As far as possible, use a dust extraction system suitable for the material.
- Provide for good ventilation of the working place.
- It is recommended to wear a P2 filter-class respirator. Observe the relevant regulations in your country for the materials to be worked.

► Prevent dust accumulation at the workplace. Dusts can easily ignite.

Operation

Starting Operation

- ▶ Observe correct mains voltage! The voltage of the power source must agree with the voltage specified on the nameplate of the machine. Power tools marked with 230 V can also be operated with 220 V.
- ▶ Hold power tool by insulated gripping surfaces 26 and auxiliary handle 3 only. The accessory may contact hidden wiring or its own cord. Accessory contacting a "live" wire may make exposed metal parts of the power tool "live" and shock the operator.

When operating the machine with power from mobile generators that do not have sufficient reserve capacity or are not equipped with suitable voltage control with starting current amplification, loss of performance or untypical behavior can occur upon switch-

Please observe the suitability of the power generator being used, particularly with regard to the mains voltage and frequency.

Switching On and Off

To start the power tool, press the On/Off switch 2 forward and then down.

To lock-on the pressed On/Off switch 2, push the On/Off switch 2 further forward.

To switch off the power tool, release the On/Off switch 2, or when it is locked, briefly press the On/Off switch 2 and then release it.

Switch Version without Lock-on (country-specific):

To start the power tool, press the On/Off switch 2 forward and then down.

To switch off the machine, release the On/Off switch 2.

► Check grinding tools before using. The grinding tool must be mounted properly and be able to move freely. Carry out a test run for at least one minute with no load. Do not use damaged, out-of-centre or vibrating grinding tools. Damaged grinding tools can burst and cause iniuries.

1 619 P09 933 | (21.12.11) Bosch Power Tools

Working Advice

- ► Exercise caution when cutting slots in structural walls; see Section "Information on Structures".
- ► Clamp the workpiece if it does not remain stationary due to its own weight.
- ▶ Do not strain the machine so heavily that it comes to a standstill.
- ► After heavily straining the power tool, continue to run it at no-load for several minutes to cool down the acces-
- ▶ Do not touch grinding and cutting discs before they have cooled down. The discs can become very hot while
- ▶ Do not use the power tool with a cut-off stand.

Rough Grinding

▶ Never use a cutting disc for roughing.

The best roughing results are achieved when setting the machine at an angle of 30° to 40° . Move the machine back and forth with moderate pressure. In this manner, the workpiece will not become too hot, does not discolour and no grooves are formed.

Flap Disc

With the flap disc (accessory), curved surfaces and profiles

Flap discs have a considerably higher service life, lower noise levels and lower sanding temperatures than conventional sanding sheets.

Cutting Metal

▶ For cutting with bonded abrasives, always use the protection guard for cutting 13.

When cutting, work with moderate feed, adapted to the material being cut. Do not exert pressure onto the cutting disc, tilt or oscillate the machine.

Do not reduce the speed of running down cutting discs by applying sideward pressure.

The machine must always work in an upgrinding motion. Otherwise, the danger exists of it being pushed uncontrolled out of the cut.

When cutting profiles and square bar, it is best to start at the smallest cross section.

Cutting Stone

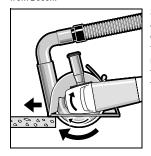

▶ Provide for sufficient dust extraction when cutting stone.

► Wear a dust respirator.

► The machine may be used only for dry cutting/grinding.

For cutting stone, it is best to use a diamond cutting disc.

When using the cutting guide with dust extraction protection guard 24, the vacuum cleaner must be approved for vacuuming masonry dust. Suitable vacuum cleaners are available from Bosch.

Switch on the machine and place the front part of the cutting guide on the workpiece. Slide the machine with moderate feed, adapted to the material to be worked.

For cutting expecially hard material, e. g., concrete with high pebble content, the diamond cutting disc can overheat and become damaged as a result. This is clearly indicated by circular sparking, rotating with the diamond cutting disc. In this case, interrupt the cutting process and allow the diamond cutting disc to cool by running the machine for a short time at maximum speed with no load.

Noticeable decreasing work progress and circular sparking are indications of a diamond cutting disc that has become dull. Briefly cutting into abrasive material (e. g. lime-sand brick) can resharpen the disc again.

Information on Structures

Slots in structural walls are subject to the Standard DIN 1053 Part 1, or country-specific regulations.

These regulations are to be observed under all circumstances. Before beginning work, consult the responsible structural engineer, architect or the construction supervisor.

Maintenance and Service

Maintenance and Cleaning

- ▶ Before any work on the machine itself, pull the mains
- ► For safe and proper working, always keep the machine and ventilation slots clean.
- ▶ In extreme conditions, always use dust extraction as far as possible. Blow out ventilation slots frequently and install a residual current device (RCD). When working metals, conductive dust can settle in the interior of the power tool. The total insulation of the power tool can be im-

Please store and handle the accessory(-ies) carefully.

If the replacement of the supply cord is necessary, this has to be done by Bosch or an authorized Bosch service agent in order to avoid a safety hazard.

If the machine should fail despite the care taken in manufacturing and testing procedures, repair should be carried out by an after-sales service centre for Bosch power tools.

In all correspondence and spare parts order, please always include the 10-digit article number given on the type plate of the machine.

After-sales Service and Customer Assistance

Our after-sales service responds to your questions concerning maintenance and repair of your product as well as spare parts. Exploded views and information on spare parts can also be found under:

www.bosch-pt.com

Our customer service representatives can answer your questions concerning possible applications and adjustment of products and accessories.
